# WHAT IS COVERLAM?

- COVERLAM is an innovative product made from natural raw materials with exceptional mechanical and aesthetic properties that surpass those of any conventional tiling material.

COVERLAM is the result of years of research and development. Thanks to the introduction of lamination pressing technology, it is now possible to produce a 1200x3600 Mm, 1620x3240 MM, 1000x3000 Mm, 1200x2600 Mm porcelain tile which may be as little as 3.5mm thick, while still maintaining the mechanical and aesthetic properties characteristic of porcelain tile. This broadens the scope of porcelain, offering great potential for innovation in the fields of construction and interior design.

# ALASKA 5,6 MM

1200x2600 MM / 1200x1200 MM / 600x1200 MM

- Onyx, considered a variety of agate, is a semiprecious stone highly valued for its exclusivity.

Two types of onyx provide the inspiration for the series: Iranian white onyx, a natural stone with golden veins composed of calcite alabasters that add depth to the pieces; and black onyx of volcanic origin, which is among the best known and most difficult to find varieties, where different bands of textures and colours, ranging from white to blue, purple and black shades, create a visual spectacle.

Among the colours that make up this collection we find the elegance and sophistication of the black Alaska, the purity and luminosity of ice Alaska and the warmth and classicism of amber Alaska; all these pieces have a mirror polish finish that lends rooms a feel of exclusivity and luminosity.

The collection is available in 5.6mm thickness and in the large formats of 1200x2600 mm, 1200x1200 mm and 600x1200 mm.

The inspiration for the Alaska model reflects the trend of infinite luxury, best defined as opulence, excess, colour and contrasts.

➤ Moisture and the passing of time leave an indelible patina on 16th century frescoed walls. Those colourful, stripped-down walls are the inspiration behind the Coverlam Fresco series.

The series comes in 1000x3000 mm, 1200x2600 mm, 1200x1200 mm and 1200x600 mm formats, and four colours—pearl, greige, ochre and grey. In addition, the pieces feature a subtle relief that enhances the graphics, making them even more realistic.

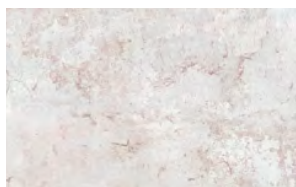

The Fresco series from Coverlam endows rooms with a unique personality and character.

# HERMITAGE

5,6 MM

1200x2600 MM

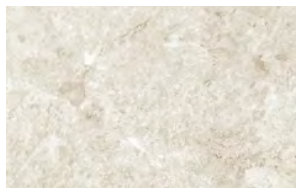

1200x1200 MM / 600x1200 MM

- Coverlam Hermitage finds its inspiration in Bateig limestone, a material that is quarried in the mountain range of the same name in the south of the Valencian Community in Spain. Like the original stone that inspires it, Hermitage has a uniform look and colour, and thanks to the technical properties of Coverlam, it is the ideal choice for tiling interior walls, flooring and facades.

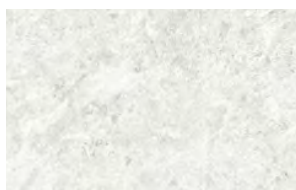

Hermitage comes in three natural colours—white, grey and sand—enriched with a subtle relief running across the entire surface of the piece.

The collection is available in 1200x2600 mm, 1200x1200 mm and 600x120 mm formats.

Coverlam Hermitage is the ideal option for creating neutral, natural and avant-garde environments.

# JUNGLA

3,5 MM

1200x2600 MM

5,6 MM

1200x3600 MM / 295x1800 MM

- Coverlam presents the Jungla series. Large slabs of up to 1200x3600 mm inspired by natural wood from different forests around the world, respecting the originality of the live and reclaimed wood.

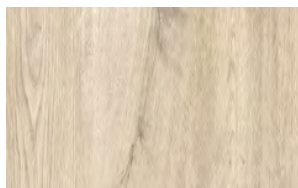

In addition to the imposing 1200x3600 mm format, the series is available in 1200x2600 mm, ideal for interior wall tiles. It also comes in the innovative 29.5x1800 mm format commonly used in traditional wooden floorboards.

Its wide-ranging colour palette makes it extremely versatile, making it possible to find style that best suits each room, from the lightest fir, through to warm cypress, a classic oak, or the reddish glints of iroko, rounded out by the darkest teak.

Despite its minimal thickness of 3.5mm and 5.6mm, Coverlam's Jungla series features a relief designed to look like brushed wood with soft knots—a naturalness that makes these pieces even more beautiful.

The Liana piece from Coverlam was born as a complement to this series, available in 3.5mm-thick, 1200x2600mm format, with the same colour palette and the look of wooden slats. A winning combination.

There is a growing trend for wood looks with superior technical features, as offered by Coverlam, and the Jungla series will undoubtedly stand out for its multiple qualities and unrivalled design.

# LIANA

3,5 MM

1200x2600 MM

1200x3600 MM / 295x1800 MM

- The Liana series by Coverlam emerges in response to the current trend for modern, serene interiors, striving for naturalness and a sense of well-being. This series perfectly recreates the look of wooden slats widely used these days for interior walls.

- With a pure, linear, pared-down design, Liana offers magnificent pieces in 3.5mm- thick, 1200x2600mm format. An elegant “deco” trend that uses wood panelling to cover walls, ceilings, doors, cupboards and wardrobes, achieving a “total look”.

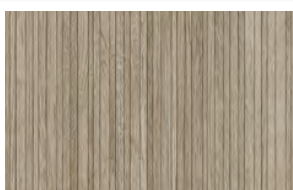

Furthermore, it can be combined with the Coverlam Jungla series, as it comes in the same colours: fir, cypress, oak, iroko and teak.
